Subject: Application for Senior iOS Developer / Team Lead iOS Position

Dear Hiring Manager,

I am writing to express my strong interest in the Senior iOS Developer / Team Lead position. With 12+ years of experience building enterprise-grade iOS applications across healthcare, telecom, fintech, and e-commerce domains, I bring deep expertise in Swift, SwiftUI, MVVM, CI/CD automation, scalable architecture, and production-scale mobile engineering.

Key Highlights:

- **Architecture & Leadership:** Designed scalable MVVM, MVC, and Clean Architecture solutions while leading iOS teams, code reviews, and mentoring initiatives.
- **Healthcare Platforms:** Built TELUS PharmaConnect and TELUS Health Virtual Pharmacy with OAuth 2.0, SSL pinning, Firebase Analytics, and Crashlytics integration.
- **Telecom & Fintech:** Core iOS developer for MyJio and implemented secure MyJioUPI Pay transaction workflows and payment integrations.
- **CI/CD & DevOps:** Automated build and deployment pipelines using Jenkins and Fastlane, and migrated dependency management to Swift Package Manager.
- **Performance Optimization:** Improved app stability, launch performance, and release efficiency through profiling, memory optimization, and scalable modular architecture.
- **AI-Assisted Development:** Leveraged GitHub Copilot, Roo Code, and Cline to accelerate development workflows and improve engineering productivity.

I would welcome the opportunity to discuss how my technical expertise, leadership experience, and passion for scalable iOS development can contribute to your team. Thank you for your time and consideration.

Yours sincerely,

Mohd Shoeb

Team Lead, Senior iOS Developer
