PROFESSIONAL SUMMARY

Senior iOS Lead with 12+ years of experience delivering enterprise-grade iOS applications across healthcare, telecom, e-commerce, and fintech and digital payments domains. Expert in Swift, SwiftUI, Objective-C, MVVM, and Cocoa Touch with deep expertise in scalable architecture, modular systems, and performance optimization. Proven ability to own end-to-end feature delivery from concept to App Store release, lead cross-functional mobile teams, and drive CI/CD automation across production environments.

TECHNICAL SKILLS

Languages & Frameworks: Swift, SwiftUI, Objective-C, UIKit, Swift Concurrency (async/await), JavaScript, Node.js, Express.js

Architecture & Design: MVVM, MVC, Clean Architecture, Coordinator Pattern, Modular Architecture, Dependency Injection, SOLID Principles, Protocol-Oriented Programming

Networking & Data: URLSession, Alamofire, RESTful APIs, Codable, JSON parsing, Core Data, UserDefaults, Keychain, SSL Pinning

Performance & Testing: Instruments, Memory & CPU Profiling, Launch Time Optimization, XCTest, TestFlight

DevOps & Tools: Xcode, Git, CI/CD, Fastlane, Jenkins, Firebase Analytics, Crashlytics, Jira, Confluence, SPM, CocoaPods

AI Tools: GitHub Copilot, Roo Code, Cline

Methodologies: Agile/Scrum, code reviews, cross-functional teamwork, mentoring

EXPERIENCE

Team Lead iOS Developer

TELUS Digital | Canada - Remote | January 2024 - Present

- Building enterprise healthcare iOS applications using Swift, SwiftUI, UIKit, and MVVM architecture.
- Integrated scalable REST APIs with centralized error handling and structured logging reducing production incidents.
- Automated CI/CD pipelines using Jenkins and Fastlane reducing release cycle time from days to hours.
- Migrated legacy dependency management from CocoaPods to Swift Package Manager improving build performance.
- Collaborated with distributed backend, QA, and product teams across Agile/Scrum delivery cycles.

Technical Specialist - Team Lead

CitiusTech Healthcare Technology Pvt. Ltd. | USA - Remote | May 2022 - September 2023

- Led architecture and feature delivery across healthcare iOS platforms as individual contributor and team lead.
- Defined scalable iOS architecture standards, conducted code reviews, and mentored engineers to improve delivery quality.
- Drove modular system design and performance optimization across client-facing mobile applications.

Senior Software Engineer - iOS App Developer

Reliance Jio Infocomm Pvt. Ltd. | India | March 2018 - April 2022

- Delivered end-to-end features on MyJio telecom application using Swift, UIKit, and MVVM architecture.

- Implemented secure UPI payment integration (MyJioUPI Pay) with OAuth 2.0 and encrypted payload transmission.
- Optimized app performance and stability through profiling, memory optimization, and crash analysis using Instruments.

Senior Software Engineer - iOS App Developer

KloudData Pvt. Ltd. | India | September 2014 - March 2018

- Designed and developed scalable, high-performance iOS applications across healthcare and enterprise domains.
- Mentored junior engineers, led code reviews, and drove architectural improvements improving maintainability.

Software Engineer - iOS App Developer

Survey Analytics Pvt. Ltd. | India | February 2014 - August 2014

- Developed survey collection iOS features using Objective-C, implementing RESTful API integrations and JSON parsing.

Software Engineer - iOS App Developer

PixelSutra Design & Services Pvt. Ltd. | India | September 2012 - September 2013

- Started iOS career as individual contributor; self-learned Objective-C and delivered production applications.

KEY PROJECTS

TELUS PharmaConnect - Pharmacy App | [App Store](#)

- Architected modular MVVM components enabling users to manage medication profiles, request prescription refills, and receive pickup notifications across iPhone and iPad.
- Integrated secure REST APIs with certificate pinning, OAuth 2.0, and Firebase Analytics/Crashlytics for data-driven UX optimization.
- Leveraged AI tools (GitHub Copilot, Roo Code) to achieve 90%+ unit test coverage and improve app performance.

TELUS Health Virtual Pharmacy | [App Store](#)

- Built Canada-wide virtual pharmacy platform with predictive prescription refill engine, pharmacist consultation booking, and video call integration.
- Designed modular Swift Package architecture ensuring code reusability and maintainability across 50K+ lines of codebase.

IntelyCare - Nursing Jobs | [App Store](#)

- Implemented on-demand mobile nursing job matching platform enabling healthcare professionals to find shifts and manage schedules.

MyJio - Telecom App | [App Store](#)

- Core developer on MyJio telecom app; implemented Talk Time/data transfer, card management, peer-to-peer money transfer, and transaction history features.
- Optimized app performance and stability through profiling and memory management across multiple production releases.

MyJioUPI Pay | [App Store](#)

- Engineered secure UPI payment gateway with OAuth 2.0, auto-deposit, transaction history with filtering/search, and high app stability through rigorous testing and performance optimisation.

EDUCATION

Master of Science - Computer Application

Symbiosis International University, Pune | July 2012

Bachelor of Computer Application

Pune University | May 2010
